

**THE POWER OF GRAPE EXTRACTS:  
ANTIMICROBIAL AND ANTIOXIDANT  
PROPERTIES TO PREVENT THE USE  
OF ANTIBIOTICS IN FARMED  
ANIMALS**

## ABOUT THE PROJECT

- The main objective of the NeoGiANT project is to develop and validate an innovative natural formulation from grape extracts with antimicrobial and antioxidant properties, which will be used as a nutritional supplement for farm animals and farmed fish. The aim is to reduce the dependence on the use of antibiotics in animal/aquaculture production. This strategy should make a significant contribution to the fight against antimicrobial resistance (AMR) originating in animal production on farms by providing an economically viable alternative to the routine use of antibiotics.
